

Three Phases of COVID Testing

GREEN LIGHT

No nasal swab test is needed at this time. Continue to go to class and work, and always follow public health guidance.

YELLOW LIGHT

Testing hold: your saliva screening indicates you need a nasal swab test because you may have COVID-19. Do not go to class or work or socialize with others. You are required to get a nasal swab test immediately.

RED LIGHT

Your nasal swab results indicate you have COVID-19. You are required to isolate even if you do not have symptoms. You will be contacted by a public health official for instructions.
